PROFESSIONAL SUMMARY

Full-stack developer skilled at seeing projects from conception to final product — collaborating across teams, communicating clearly with stakeholders, and collaborating others to deliver responsive, cross-platform web applications across 3 production applications.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Swift

Frontend: HTML5, CSS3, React.js, SwiftUI, TypeScript, Responsive Design

Backend & APIs: Node.js, RESTful APIs, JSON, MVVM Architecture, Authentication

Databases & Cloud: Firebase, MySQL, MongoDB, Cloudinary

Tools: Git, GitHub, GitHub Actions (CI/CD pipelines), VS Code, Xcode, Netlify

AI & Prompt Engineering: Anthropic Claude API, Prompt Engineering, AI Integration, LLM, RAG (Retrieval-Augmented Generation)

ENGINEERING PROJECTS

Personal Portfolio Website

Mar 2025 – Present

- Integrated a custom-prompted LLM chat-bot enabling visitors to interact with my background and projects in real time.
- Developed and deployed a portfolio site with dark/light mode, mobile-first responsive design, and multi-page navigation using HTML, CSS and JavaScript.

CompanionCare – Pet Health & Community Web App

Jan 2026 – Jun 2026

- Shipped a full-stack pet care platform built with React.js, Node.js, and TypeScript, taking it from zero to production in 6 months and supporting 5 concurrent team members across a live user base.
- Integrated AI-powered features, including an LLM-driven assistant that gives users personalized pet care guidance and recommendations.
- Optimized REST API performance to maintain sub-200ms response times under live traffic.
- Implemented JWT-based authentication and role-protected routes, securing 100% of user data endpoints.
- Modeled Firebase Firestore data structures to support complex pet and user relationships across database design and API integration.

ProjectClean – Full-Stack Issue Reporting Platform

May 2025 – Jul 2025

- Architected a full-stack reporting app using React.js and Node.js, with RESTful APIs, MongoDB persistence, and Cloudinary image uploads.
- Launched an admin dashboard with real-time report tracking, improving workflow visibility and reducing manual follow-up.
- Designed the full data flow end-to-end, giving student users real-time visibility into their submitted reports and staff administrators live status updates without needing a page refresh.

PROFESSIONAL EXPERIENCE

Zhang & Cheng Medical P.C.

Jan 2022 – Present

Medical Receptionist & IT Support Specialist

Brooklyn, NY

- Proactively diagnose and resolved hardware, network, and EHR software issues (e.g., workstation failures, connectivity outages, software glitches) before they impacted patient operations, maintaining consistent daily uptime over 3+ years.
- Administers and update electronic health records (EHR) in iClinic for 100+ active patient records, ensuring data accuracy and HIPAA compliance.
- Train and onboarded staff on clinical software and equipment, coordinating patient intake and scheduling to support seamless daily operations.

EDUCATION

Hunter College (CUNY)

June 2026

Bachelor of Science in Computer Science

New York, NY

CERTIFICATIONS

CodePath – Applications of AI Engineering

In Progress

CodePath – Foundations of AI Engineering

Completed: May 2026

LEADERSHIP & ACTIVITIES

Hunter Chinese Student & Scholar Association

Feb 2024 – Present

Vice President

- Directed a 20+ member executive board to plan and execute campus-wide cultural events, growing average attendance from 40+ to 70+ students in a semester — a 75% increase.
- Guided and onboarded 10 new members through structured resource-sharing and mentorship, accelerating their integration and strengthening board execution across all events.
